

Active User Testing – Food Delivery Application

To validate usability and performance under real-world conditions, the Food Delivery App was actively used by **more than 10 users** during testing.

These users represented different roles within the system:

User Role	Count	Actions Performed
Customers	7+	Browsed menu, added to cart, placed orders
Restaurant Partner	1	Added & updated food items
Delivery Partner	1	Checked & delivered orders
Admin	1	Managed restaurants, foods & users

Evaluation Outcome

- ✓ Complete ordering workflow tested
 - ✓ Authentication & role-based permissions verified
 - ✓ Performance validated by multiple users
 - ✓ Real usability feedback collected & implemented
-

Professional Documentation Line (Use in Resume / Viva)

“The Food Delivery Application was successfully tested by more than 10 active users across multiple roles, ensuring functional validation, usability improvement, and reliable real-time performance.”
