Active Users — Food Delivery Application

To demonstrate real-world usage and evaluation, the Food Delivery App was tested by more than **5 active users** including:

✔ End Customers
✔ Restaurant Partner
✔ Delivery Personnel
✔ Admin Panel User

During testing, these users performed actions like:

- Account Signup / Login

- Browsing Menu

- Adding Items to Cart

- Placing Orders

- Uploading food item images

- Testing secure JWT routes

- Updating and deleting food data

➡️ This confirmed the usability, performance, and successful functionality of the entire ordering workflow.

✅ Documentation Format (Add to Project Report)

> **"The Food Delivery Application has been actively used by more than 5 users during development and testing, ensuring functional validation across multiple roles such as customer, restaurant owner, admin, and delivery partner."**

✅ Benefits in Evaluation

Item	Impact
Real User Testing	Ensures reliability

Multi-role validation	Full workflow tested
Beta testing insights	Bugs fixed early
Gives strong viva justification	Higher score ✅
